How Clicker Racing on Facebook: Clicker Racing Subreddit: you have any questions or reviews, Please contact: support@nopowerup.com This game is a lot of fun I like boosters you can use if the boss travels faster, but I have one question there is a thing where he says you can collect milk, but how do you do it (higher level?, new update?,) I do not know, but in any case the game is straight up fun and you have to make more games like this! (Also you can explain how we get and use milk!) This is a really fun and exciting game. I spent hours on this trying to get higher and higher in tournaments. With all that said the app can really use more frequent updates. Many features become obsolete over time. In addition, the rewards section says collect 10 cars and there are only 6 available and there have been more added for months. Y'all have a very funny game here, please don't let him die because of complacency. There seems to be a programming flaw. If you want to align the MPS generator 10 or 100 times, you should be able to align only when you can afford 10 or 100 levels, no more. Other than that, it's a great game. The developer, No Power-up, did not provide Apple with details about its privacy and data processing practices. For more information, you can learn about the developer's privacy policy. The developer will be able to provide privacy information when the next app update is sent. The developer of the App Support privacy policy is Hello to everyone. Let's try to create a list of the best magic tools and the worst. We will divide them into groups as a priority, with the aim of achieving the highest stages.it it would be like guidance to help us all. TIER 1Glove Management (Increase Prestige Bonus).Dr. Han's Fuse Box (Reducing laps per stage). Monkey Washer (Increase tech generator MPS). Dragon Rib (Increase HR MPS Generator). Angel transmitter (increases the critical chance of a crane). Helmet protection (increase the bonus speed cards). Conductor Jim (Increase bonus distance Click) Yuri Fizzy fuel (increase all MPS magic tools). If I'm wrong, please fix it below. Below.
